DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5,8-20 are drawn to semiconductor device, classified in class 257, subclass 694+ .
- II. Claims 6-7 are drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 106 +.

The inventions are distinct, each from the other because of the following reasons:

Inventions Gr. I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case that the product as claimed can be made by another and materially different process namely by a process that does not include the steps of providing a base substrate including a base wiring pattern (as recited in the device claims).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Lawrence McClure, Esq., (R. No. 44,228) on October 18, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
